**SUBSTANCE ABUSE AND MENTAL HEALTH SERVICES ADMINISTRATION
MINORITY FELLOWSHIP PROGRAM
American Nurses Association**

**2020 Intensive Training Institute
March 18-22, 2020
Honolulu, HI**

The Substance Abuse and Mental Health Services Administration (SAMHSA) Minority Fellowship Program (MFP) at the American Nurses Association (ANA) and other Psychiatric Nurses and Behavioral Health Professionals will convene our 2020 Intensive Training Institute (2020ITI), March 18 – 22, 2020 in Honolulu, HI. We expect to bring together more than 70 participants including the MFP doctoral and masters' scholars, National Advisory Committee members, alumni, members of local minority and indigenous communities, students and faculty at the University of Hawaii at Manoa and other local universities, nursing organizations and friends of the MFP/ANA.

The 2020 ITI will be expanded to a 4-day educational event because of the urgency and importance of providing a relevant framework focused on incorporating an intersectional approach to understanding the impact of trauma, racism and social determinants on behavioral health. Additionally, other relevant content requested by both current and past Fellows has been included in the agenda. Therefore, for the first time the MFP/ANA ITI will include pre-institute workshops, Fellows research and practice pitches, practical discussions about the present and future state of psychiatric behavioral health care in the minority and indigenous populations and more.

The 2020 ITI theme will focus on *The Intersectionality of Trauma, Racism, and Social Determinants of Behavioral Health across the Life Span: Implications for Prevention Strategies, Practice, Research, and Policy.*

At the end of 20ITI participants will be able to:

1. Discuss the meaning of intersectionality and how it can be applied to prevention strategies, research, education, practice and policy.
2. Describe how the intersection of trauma, social determinants and experiences of racism in childhood and adolescence are linked to poor mental health and substance abuse across the life span.
3. Explore application of social, behavioral, and genetics data to develop mental health nurse-led research, prevention strategies, practice, education and policy interventions.
4. Identify at least three skills and/or strategies for writing grants.

5. Discuss how the community engagement activity highlighted the intersection of racism and social determinants' impact on mental health and substance abuse health disparities in native indigenous communities in Honolulu.
6. Engage in the work life balance activity and identify at least two stress reduction strategies to implement over the year.
